## login-controller

GET	/api/logout	Logout of the app	
Parameters	<div>Try it out</div>		

No parameters

## Responses

Code	Description	Links
200	OK	No links

GET

/api/login Login to the app

## Parameters

Try it out

No parameters

## Responses

Code	Description	Links
default	The OAuth2 authorization URL	No links

Media type

application/json

Controls Accept header.

Example Value | Schema

```
[
  {
    "url": "string"
  }
]
```

GET

/api/loggedin The redirect from the login page

## Parameters

Try it out

Name	Description
------	-------------

Name	Description
<b>code</b> * required string (query)	<input type="text" value="code"/>
<b>state</b> * required string (query)	<input type="text" value="state"/>

Responses

Code	Description	Links
200	OK	No links

GET

/api/isLoggedIn

Get Login state

^

Parameters

Try it out

No parameters

Responses

Code	Description	Links
default	State of the login	No links

Media type

application/json

▼

Controls Accept header.

Example Value | Schema

```
[
  true
]
```

GET

/api/circle Get Circles

## Parameters

Try it out

No parameters

## Responses

Code

Description

Links

400

Circles not found

No links

Media type

\*/\*

Example Value | Schema

```
[
  {
    "displayName": "string",
